This book is a compilation and development of materials for teachers to use as part of their responsibilities in planning and conducting activities during the teaching and learning process in the classroom. This material will assist teachers and students in performing their tasks in the classroom activities. The teaching of four skills are essential for architecture and civil engineering students because they will require the skills in performing their tasks and duties as architects and engineers in their daily activities. The students are expected to read a lot of materials, articles, text books; to write sentences and paragraphs; to explain, express, and present ideas verbally.

The material is particularly aimed at:

- building students' creative thinking by reading various materials critically in the field of architecture and civil engineering.
- providing students with opportunities to express specific concepts by reformulating and discussing topics in their own words while developing sentences and writing simple paragraph on the topic being discussed.
- improving students' writing skill by developing ideas gradually from simple to a more advanced paragraph about architecture and civil engineering.
- creating opportunities for students to express and explain ideas in spoken language related to architecture and civil engineering.

'English for Specific Purposes: A Self-study Guide for Architecture and Civil Engineering Students' fosters and encourages students to be more active and creative in finding opinions regarding the concept of design to be shared to other students. It is therefore intended that this material will inspire students in seeking new materials in the field of architecture and civil engineering or other general topics which can be used in the classroom activities.

TABLE OF CONTENT

Preface	v
How to Use This Book	vii

UNIT I - READING

01	CLIENTS & ENQUIRIES	
	Dealing with Clients	3
	Dealing with Different Types of Client	9
	Dealing with Enquiries	13
	Grammar Note - Part of Speech	19

02	PUBLIC TRANSPORTATION	
	Hyperloop	23
	LRT - Light Rail Transit	33
	Monorail	36
	MRT	42

03	BUILDINGS	
	Building Types	51
	Buildings and Decorating Materials	55
	Grammar Note - Active and Passive Construction	64

04	ROLE AND RESPONSIBILITIES	
	Roles and Responsibilities	67
	Architecture Style and Trends	72
	International Airport	75
	Grammar Note - Conditional Sentences	80

UNIT II - WRITING

05	IMPROVING WRITING SKILLS	
	Describing Building or Parts of The Building	87
	Describing Building of Place	93
	Analyzing Essays	95
	Paraphrasing and Summarizing	103
	Grammar Note - Clauses	106
